

Volunteers are needed to participate in a study

“Accounts of care partnerships with wounded, ill or injured service members”

Are you a Caregiver of a Service Member receiving healthcare at Walter Reed National Military Medical Center?

Share your caregiver story in an individual or care partner group conducted at Walter Reed National Military Medical Center.

Knowledge gained from your caregiver experiences is invaluable to improving patient health and outcomes in the education of healthcare providers, and to inform healthcare policy. If you or someone you know assists or provides care to someone who has sustained an injury or is ill we would very much like to hear from you. This will be a one-time commitment of 60-90 minutes.

For more information or participation information
and/or to schedule an interview, contact:
